## Chapter 1 G3568 Development Board Brief Introduction

### 1.1 Brief Introduction

G3568 development board is based on Rockchip RK3568(64bit quad core) platform, which is designed by Shenzhen Grapera Rain Technology Co., Ltd. RK3568 is 22nm Cortex-A55, frequency up to 2.0GHz. Cortex-A55 provides up to 100% performance improvement compared to the previous A15/A17 core design.

RK3568 is integrated with ARM G52 2EE graphics processor.

- Support OpenGL ES1.1/2.0/3.2, OpenCL 2.0, Vulkan 1.1, embedded high-performance 2D acceleration hardware.
- Support 4K 60fps H.265/H.264/VP9 video decoding, 1080P 100fps H.265/H.264 video encoding.
- Support 8M ISP, support HDR, NPU support 0.8T computing power.

Such powerful GPU and NPU can be applied to many applications, such as computer vision, machine learning, 4K 3D rendering, etc.

Other interfaces: MIPI-CSI, dual MIPI-DSI, EDP, HDMI, PCIe, SATA, CAN, USB3.0, USB2.0, OTG and others.

In addition to the powerful RK3568, G3568 development board is also equipped with 2GB/4GB LPDDR4, 8GB/16GB/32GB eMMC, independent power management system, powerful network expansion capability, rich display interfaces. It supports Android11, Linux, Debian.

G3568 development board consists of stamp hole system on module and carrier board. 8-layer PCB designed system on module has 208 pins, can run up to 2.0GHz frequency.

G3568 development board has rich function expansion interfaces, which can effectively improve the scalability of industry customization. G3568 supports PCIe3.0 1x2/2x1 Lane and PCIe2.1 1x1 Lane at the same time, meeting the expansion requirements of 4G/5G, wifi6, multiple network ports, NPU, etc. RK3568 supports 3x SATA3.0, solves various USB expanding to SATA instability problems of traditional AP processor. RK3568 supports up to 4 USB ports, 1xUSB3.0/USB2.0 HOST + 1xUSB3.0/USB2.0 OTG + 1xUSB2.0 HOST + 1xUSB2.0 HOST. RK3568 also supports dual Gigabit Ethernet ports to meet the multi-network port requirements of industrial control and IoT gateways.

#### **G3568 development board features:**

- Size: 180mm\*110.5mm, can be used in final product.
- Powerful functions, rich interfaces, wide applications.

- Supports android11, Linux, Ubuntu, Debian. Source code open, accelerate develop time.
